

THE NEW ALL-ELECTRIC PEAQ

SKODA

Effective from 20th August 2026.

This is Peaq comfort

The all-new Škoda Peaq arrives as the flagship of the Škoda range. The most spacious and technologically advanced Škoda ever created, it delivers exceptional comfort and refinement, whether you're enjoying the journey or taking a moment to unwind at your destination.

Its large dimensions are a perfect canvas for the simple lines and robust details of the Modern Solid design language. Its focal point is the new Tech Deck Face in front, housing sensors driving assists. T-shaped LED lights front and back create an unmistakable signature.

Inside, Peaq provides an unrivalled amount of space. It is the first electric Škoda that can seat up to seven passengers – and all of them in complete comfort. The new vertical infotainment, together with new Sound by Sonos stereo system and Relax seats offers a unique experience, enhanced by the new Wellbeing app. On the practical side, there's up to 890 litres of boot space with the 3rd row folded down.

The Peaq also offers the longest range in the Škoda line-up. It can drive more than up to 395 miles with the larger 91 kWh battery, (V2L) via a port in the boot.

This is a new peak of what Škoda can offer. Smart, spacious, stylish.

Models shown are not UK specification. Some of the equipment shown is optional.

On The Road and P11D pricing

Peaq SE L	VED Band	Insurance group (50)	Recommended Basic (excl VAT)	VAT	RRP	Recommended OTR	BiK 2026/27	P11D value
90 91kWh 210kW	A	TBC	£42,754.17	£8,550.83	£51,305.00	£51,980.00	4%	£51,915.00
Peaq Edition

Pricing valid as of 20th August 2026.

All prices listed are Manufacturer's 'On the road' Recommended Retail Price. Škoda may change prices at any time (this includes where there are government changes in regulation and/or legislation). There may be a delay to any RRP displaying correctly on our materials. Always obtain prices from your chosen Retailer. Images shown do not reflect the stated entry level prices.

In order to preserve the usable capacity of the battery as much as possible, it is recommended to set a charging target of 80% for daily operation and use (which can be switched to 100% before long distance journeys for example).

The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery.

Information regarding tyre technical specifications can be found by visiting the Škoda car configurator [here](#).

VED (Vehicle Excise Duty) from 1st April 2026

VED Band	CO ₂ (g/km)	Petrol/diesel/alternative fuel cars* (tax class 48, 49 and 59) 12 months
A	0	£10
B	1-50	£115
C	51-75	£135
D	76-90	£280
E	91-100	£365
F	101-110	£405
G	111-130	£455
H	131-150	£560
I	151-170	£1,410
J	171-190	£2,270
K	191-225	£3,420
L	226-255	£4,850
M	over 255	£5,690

OTR (On The Road)

Recommended 'On The Road' prices include delivery, 12 months Road Fund Licence, DVLA First Registration Fee and apply to the UK only.

VED (Vehicle Excise Duty)

All vehicles will be subject to Vehicle Excise Duty based on the fuel type of the vehicle and its carbon dioxide (CO₂) emissions level, measured in grams per kilometre (g/km). Due to changes in vehicle emissions data, CO₂ figures may differ on these vehicles if taken from current Škoda UK stock.

Vehicle Excise Duty (VED) is correct at time of publication, but this may alter to reflect any change in the applicable VED rate.

* This rate applies to diesel cars tested to real driving emissions step two (RDE2) standards

Note: Vehicles with a list price exceeding £50,000 (including factory installed options, delivery charge, number plates and VAT) will pay an additional £440 plus the standard rate VED from year 2 to, and including, year 6. After the 6th year only the standard rate VED will apply.

Pricing valid as of 20th August 2026.

All prices listed are Manufacturer's 'On the road' Recommended Retail Price. Škoda may change prices at any time (this includes where there are government changes in regulation and/or legislation). There may be a delay to any RRP displaying correctly on our materials. Always obtain prices from your chosen Retailer. Images shown do not reflect the stated entry level prices. The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery.

Benefit in Kind example

Based on
Peaq SE L 90 91kWh 210kW

P11D value		£51,915.00
Company car BiK tax based on CO ₂ emission level		4%
Taxable BiK (for 2026/27 tax year):	4% of £51,915.00	£2,076.60
Annual company car tax (2026/27)		
20% income tax	20% of £2,076.60	£415.32
40% income tax	40% of £2,076.60	£830.64
Monthly company car tax (2026/27)		
20% income tax	£415.32 divided by 12 months	£34.61
40% income tax	£830.64 divided by 12 months	£69.22

Company car tax is based on the vehicle's carbon dioxide (CO₂) emissions. The higher the emissions, the higher its tax liability. When a company car is made available for private use a 'Benefit in Kind' value is calculated for tax purposes. The table above will help you calculate your tax liability.

P11D (expenses and benefits)

The P11D value is calculated by taking the On The Road (OTR) price for the vehicle, less the Road Fund Licence (RFL) and First Registration Fee (FRF).

BiK (Benefit in Kind)

The BiK percentage value is based on the CO₂ emissions of the vehicle for the current tax year 2026/27.

Build your own

Engineered art

Bold style on a grand scale. The new all-electric Peaq is not only the largest Škoda, it also exudes a powerful presence. The T-shaped headlights and rear lights create an easily recognisable light signature. The eight vertical slats in both the front and rear bumper add a touch of robustness to the imposing and elegant look of our new flagship.

Models shown are not UK specification. Some of the equipment shown is optional.

Additional
information

Models shown are not UK specification. Some of the equipment shown is optional.

Modern Solid Design

Beauty is in simplicity. The robust yet elegant look of the Peaq is built on straight lines. The Tech Deck Face with light band emphasises this with a unique light signature and adds a high-tech, futuristic touch.

Aerodynamic rear

Simple, bold shapes can make for great aerodynamics. The roof spoiler and rear diffuser help the airflow, contributing to the drag coefficient of 0.25.

Virtual Pedal and easy close function

The Virtual Pedal combines hands-free tailgate operation with the intelligent Easy Close Walk Away function, which automatically closes and locks the bootlid as you leave the vehicle with the key, providing seamless convenience when your hands are full.

Flush door handles

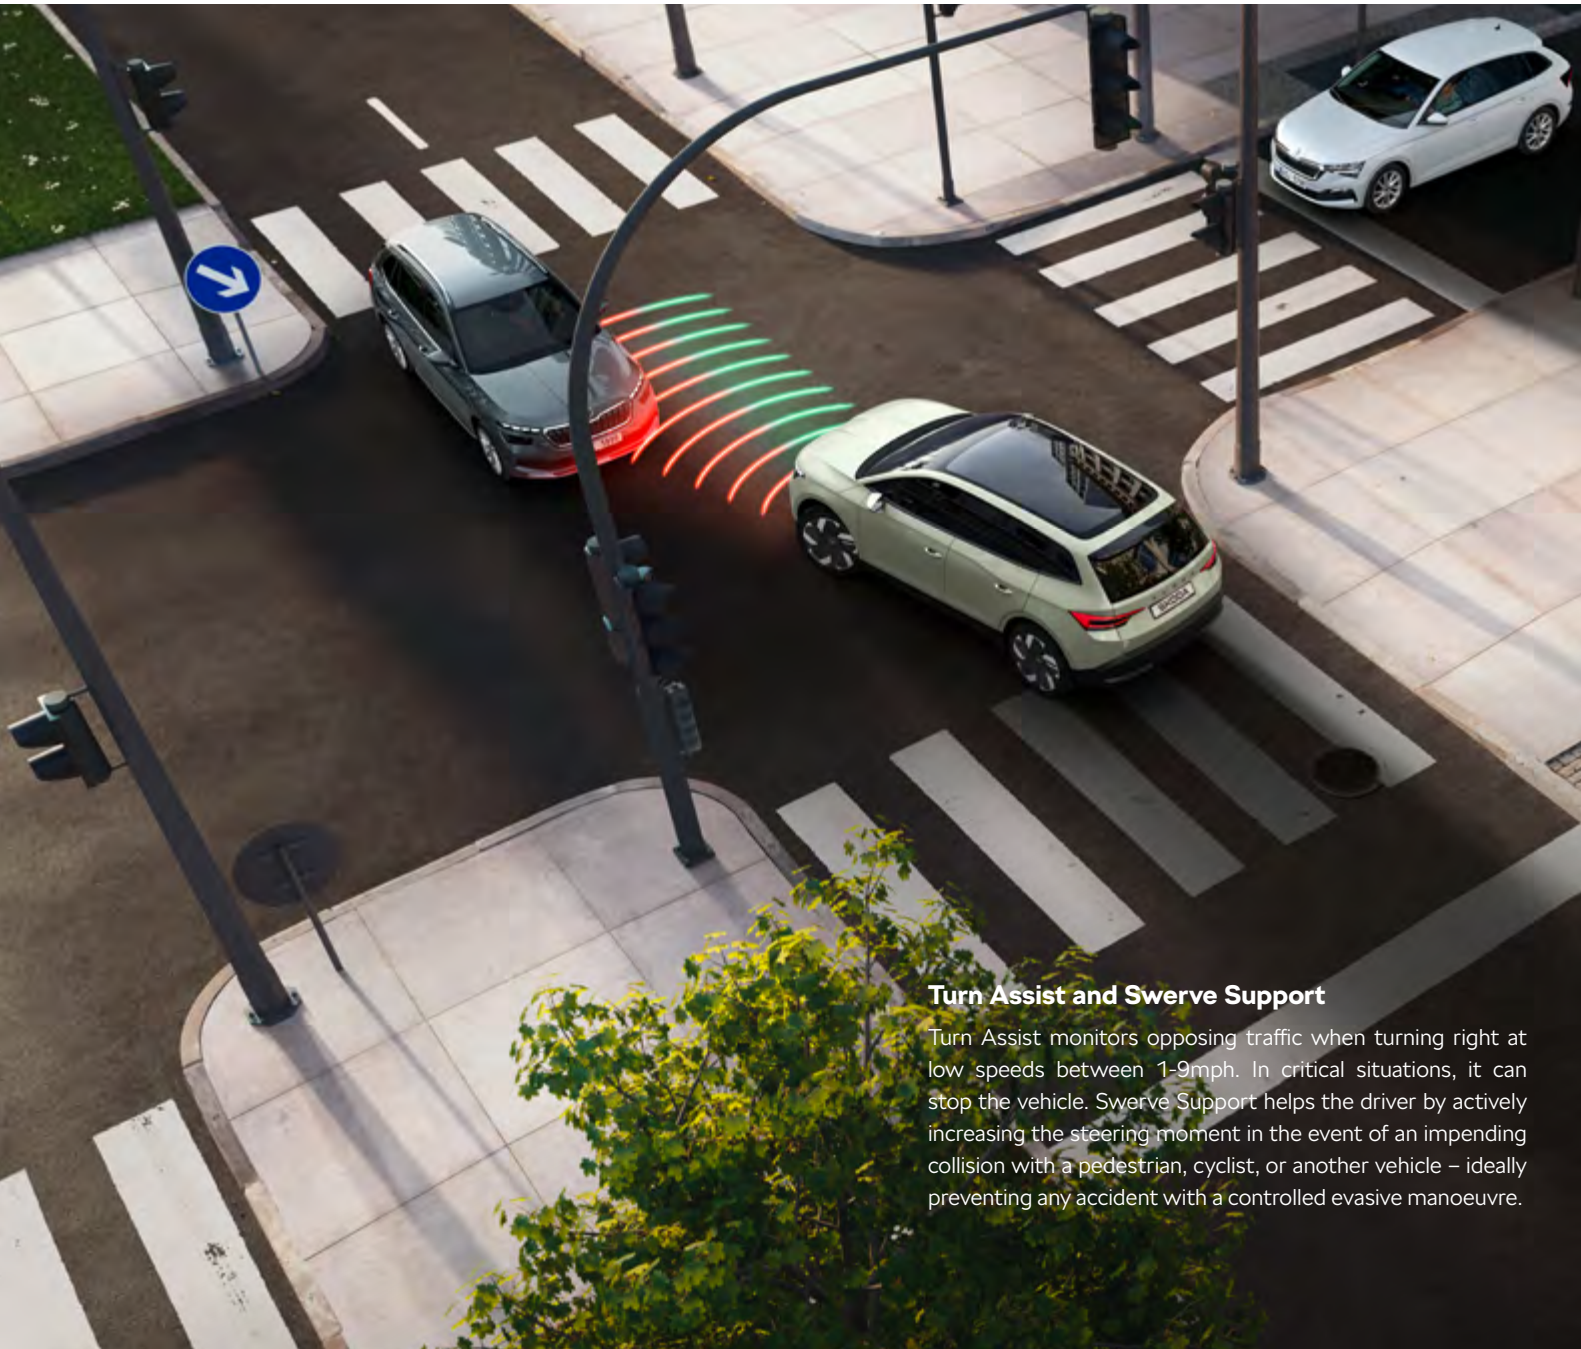

The door handles retract electrically when driving or parked to achieve better aerodynamics and sleeker looks. They automatically deploy when approached with either the Digital Key or standard key. If necessary, it is also possible to open them manually by pushing on the front end, so the car can be accessed even without electric power.

Designed for all seasons, the flush door handles incorporate an innovative hammer-effect function that creates a series of subtle pulses to loosen ice build-up, helping ensure smooth operation even in freezing temperatures.

Models shown are not UK specification. Some of the equipment shown is optional.

Travel Assist

Travel Assist utilises several advanced driving assistance systems and features to enhance comfort and safety in various situations. Improved lane keeping functionality together with speed adjustments makes driving easier, while other safety features, like Turn Assist, make it safer. However, the system must still be constantly monitored as the responsibility always lies with the driver.

Turn Assist and Swerve Support

Turn Assist monitors opposing traffic when turning right at low speeds between 1-9mph. In critical situations, it can stop the vehicle. Swerve Support helps the driver by actively increasing the steering moment in the event of an impending collision with a pedestrian, cyclist, or another vehicle – ideally preventing any accident with a controlled evasive manoeuvre.

Exit Warning System

When your car is stopped and you open any door, the system will check for other road users, such as vehicles, cyclists, runners, or pedestrians, at a distance of up to about 40 metres. If it detects an approaching object, it warns the passengers in the front and rear, both visually and audibly, about getting out of the vehicle.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model.

Models shown are not UK specification. Some of the equipment shown is optional.

Additional experts on board

To ensure that the car is ready to handle all situations that may occur on route, additional assistants with multiple functions are on hand to help or fill in for the driver.

Trained Parking

A highly advanced parking assistant is used to automatically complete a parking manoeuvre in a familiar environment, e.g., at home. First, the driver performs the parking manoeuvre and saves the route to the system's memory. For example, it records the route from the entrance to your property to the garage or a parking space. After that, as soon as the car recognises the scanned route, it will ask you (via the infotainment) whether it should take control. Following your approval, the vehicle will park itself. You simply monitor it from the driver's seat.

Reversing Assist

A difficult spot to reverse out of? Let your car do it. Reversing Assist remembers the way in and can back out automatically for distance of up to 50 metres. You just need to control your speed using the pedals and watch over the whole process, as the car steers itself.

Remote Trained Parking

Train your car to perform a parking manoeuvre and oversee the process from the outside. Remote Trained Parking is a highly advanced parking assistant which enables the car to perform familiar parking manoeuvres without the driver being present in the car. First, the driver performs the parking manoeuvre and saves the route to the system's memory. For example, it records the route from the entrance to your property to a parking space. After that, as soon as the car recognises the scanned route, it will ask you via the infotainment whether it should take control. Following your approval, the vehicle will park itself, as long as you stay next to it and monitor the process for safety. You simply monitor it from the outside, using your phone app.

Remote Parking

Let your car park itself while you just watch from the outside. With Remote Parking Assist, you can use the Park Assist feature to park in parallel or perpendicular spaces. Finally, you can move the car in or out of the parking space. For safety, the driver needs to watch the whole process and control the car by keeping the button in the app pressed.

This is an illustrative image depicting an assistance system feature and does not represent any specific Škoda model. Models shown are not UK specification. Some of the equipment shown is optional.

INNOVATION AT EVERY TURN

Models shown are not UK specification. Some of the equipment shown is optional.

A space to relax

What if you could drive your living room? The new all-electric Peaq lets you do exactly that, with style. Seven seats mean you can take your family or friends along on the road. The fold-out table lets you picnic even when the weather disagrees. The new 13.6" vertical infotainment becomes the focal point that provides information, entertainment, or even sets the right mood for the moment. Just select one of the modes of the Wellbeing app for a moment of relaxation and calm, or to stretch your arms after a long drive. Enjoy it in the shade or under the stars with the new panoramic glass roof with Dynamic Shade Control. And of course, you can choose from a range of attractive Design Selections. This is the Peaq of family driving.

Models shown are not UK specification.
* Black headliner and three-spoke steering wheel available as an option.

High-tech lounge

All the information and the right mood. The driver display put the most important things right in front of your eyes. The brand new 13.6" vertical display provides more detailed information. You can also make it your own with the selection of apps from the Škoda Connect Shop.

Cockpit of the future

The compact 10.25" driver display in the Peaq is meticulously designed to present only the essential information for an electric car driver. In addition to standard driving data, you can prioritise navigation, driving assists, or both. The most important content can also be projected onto the Augmented Reality Head-Up Display, including "floating" navigation arrows.

Vertical display

Controls on hand and information in the field of view with the new 13.6" vertical display. The new configuration makes it easier to use while driving, while the infotainment uses the latest Android-based system and offers the possibility of downloading Škoda apps.

* Models shown are not UK specification. Some of the equipment shown is optional.

Connectivity

With MyŠkoda application, you can access important information and controls remotely from your phone. With Apple CarPlay or Android Auto, you can safely and easily use selected smartphone apps on the infotainment screen.

Centre console

A pair of illuminated magnetic holders provide charging for two phones using the Qi2 standard with up to 25 watts. They also keep the phones securely in place for optimum efficiency. The compartment is also easily accessible and provides cooling to prevent your devices from overheating.

The three physical toggles on the centre console let you easily control the climate in the car. The outer ones control the temperature for each side of the cabin. The inner one allows you to choose from five levels of ventilation intensity.

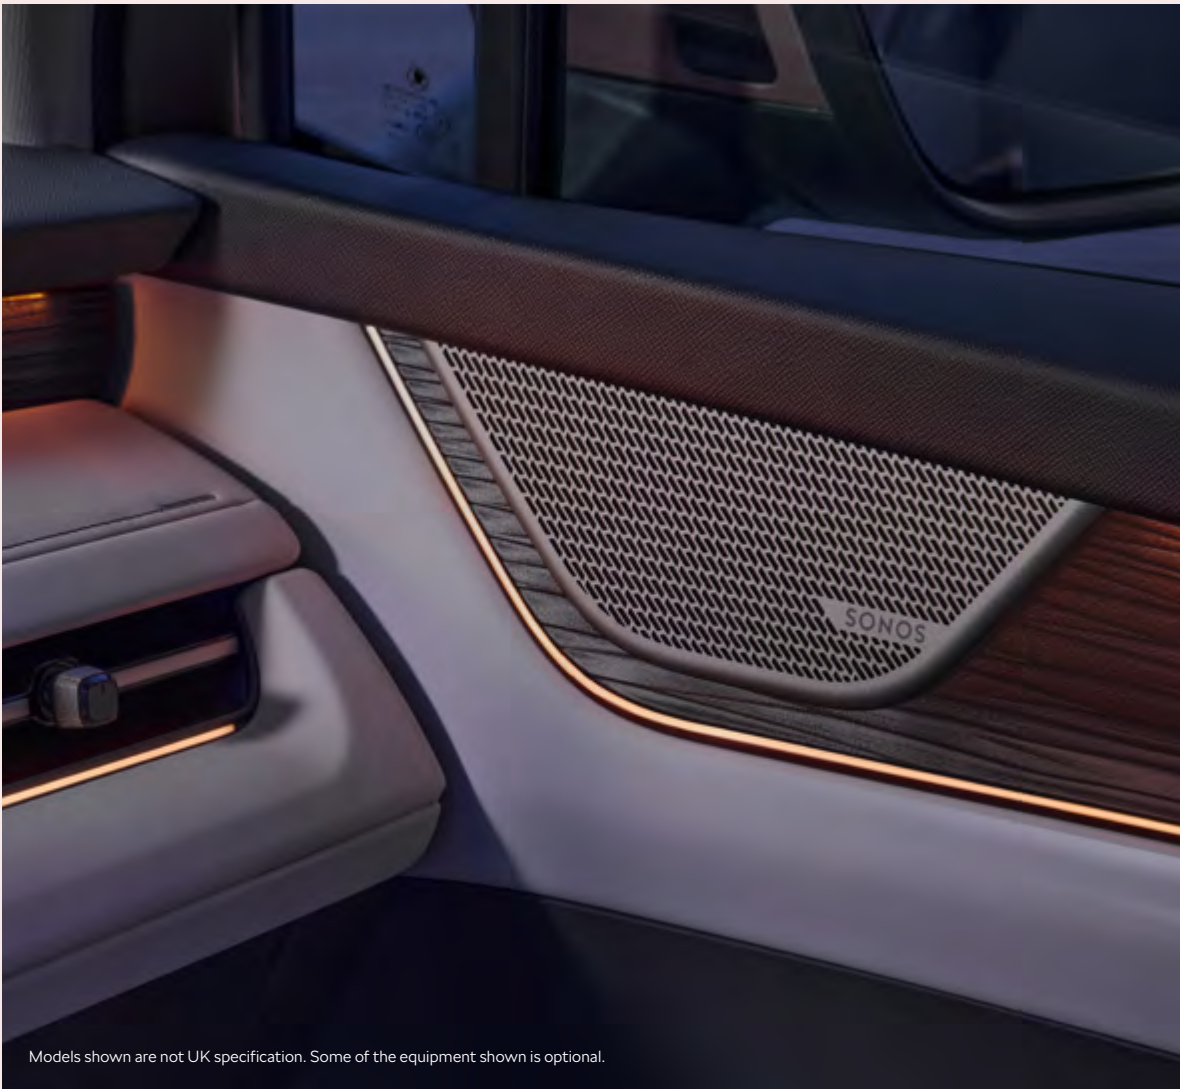

Models shown are not UK specification. Some of the equipment shown is optional.

Relax Package

Enjoy a moment of calm, a time to properly relax. Turn the front seats into comfortable lounge chairs with Relax mode and select one of the massage programs. Rest your head on the comfortable pillow. Treat yourself to a drink or a snack from the handy table on the centre console. Let the Wellbeing app set the mood you like. And, of course, enjoy the immersive sound by Sonos. It's a time for yourself.

Models shown are not UK specification. Some of the equipment shown is optional.

Models shown are not UK specification. Some of the equipment shown is optional.

Sound by Sonos

The new sound system created in cooperation with Sonos delivers the brand's signature clear sound reproduction, a balanced listening experience, and an immersive three-dimensional sound. Enjoy your favourite music or podcast while driving or enjoy a moment of mindfulness while parked.

Models shown are not UK specification. Some of the equipment shown is optional.

16 speakers

Immerse yourself in the clear and intensive 3D sound. The 16-channel premium sound system includes a subwoofer, two surround speakers, a centre speaker, and even two A-pillar mounted 3D speakers to make you feel like the cabin is filled with sound.

Relax seats

Turn your seats into comfortable armchairs and just relax or listen to your favourite music. The Relax Mode, available only when parked, reclines the seat into a comfortable position and folds out a leg rest for even more comfort. You can enjoy the ergonomically designed seats and massage function at any time.

Panoramic glass roof with Dynamic Shade Control

Pleasant shade or a clear view? That's up to you. Simply dim the panoramic roof to protect you from sunlight or make it clear so you can watch the stars. You can set any combination of nine segments to dim or clear mode.

Space folded into ideas

It's not just about all that room. It's about the clever way it's used. Everywhere you look, you will find ingenious details and clever ideas. But most of all, lots and lots of room.

Three-row seating

Space for everyone, wherever the journey leads. The new all-electric Peaq offers seating for up to seven passengers, combining exceptional comfort with outstanding versatility. The third-row seats fold neatly from the boot floor when needed, giving you the flexibility to switch seamlessly between carrying extra passengers and maximising luggage space. Designed with practicality in mind, third-row occupants benefit from dedicated USB-C charging ports, cup holders and storage compartments, ensuring every passenger can travel in comfort, whether it's the daily school run or a family adventure further afield.

Models shown are not UK specification. Some of the equipment shown is optional.

Models shown are not UK specification. Some of the equipment shown is optional.

Rear seats

Wide enough for three, or with extra comfort for two. The fold-down armrest comes with a cupholder. You can also place your food, drinks, and small items in the storage compartment on the rear tunnel.

Models shown are not UK specification. Some of the equipment shown is optional.

Third-row seats

Space for everyone. The third-row seats in the Peaq fold out from the boot floor, allowing you to choose between more cargo space or space for seven. They even come with their own cup holders, storage compartments, and USB-C ports.

Boot

Space for everything. Peaq is able to hold 299 litres behind the third row, or 890 litres with the rearmost seats folded. Need a really huge space? Fold the second row and get up to 2,075 litres for lots of cargo or really large items. And it is not just about space – with its various smart features and compartments, the Peaq takes the ease of transporting both small and large items to another level.

Models shown are not UK specification. Some of the equipment shown is optional.

Smart storage

There's space for everything, and everything has its place. The boot of the Peaq is full of clever ideas. There are storage compartments, smart hooks for hanging up bags, plus dividing nets and cargo elements to neatly organise your luggage.

Double floor

There's even more space hidden under the floor. You can use it for items that you need to keep separate from the rest of your luggage, or you can simply remove the floor and increase the space.

Models shown are not UK specification. Some of the equipment shown is optional.

Electric parcel shelf

Keep your luggage hidden and shaded from the sun at all times. The electric parcel shelf automatically opens and closes with the bootlid.

Frunk

Your charging cables, electric parcel shelf or car essentials like brush. Those are the items that can be always on hand in your frunk. Of course, with 37 litres of volume, there's also a space for a lot more.

Models shown are not UK specification. Some of the equipment shown is optional.

* WLTP combined range. Figures shown are for comparability purposes; only compare electric range figures with other vehicles tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles, vehicle load and the starting charge of the battery. Figures for battery electric vehicles were obtained after the battery had been fully charged. Battery electric vehicles require mains electricity for charging. Data correct at 30th July 2026. Choice of wheels and other options may affect consumption and range data. Charging times will depend on various factors, including temperature, state of the battery, state of and capabilities of the charging unit and power supply. Actual charging time will vary depending on the level of charge in the battery, as well as environmental conditions. Charging times will also be affected by the charging curve for example once charging passes 80%, charging will slow to protect the battery's longevity. However, in order to preserve the usable capacity of the battery as much as possible, it is recommended to set a charging target of 80% for daily operation and use (which can be switched to 100% before long distance journeys for example)

Design Selection Loft

The textile on the seats is complemented by the grey stitching to create a relaxing feel that is reflected in the grey Techtona pad, also with grey stitching. The look is rounded off by the Grained Stripes décor.

Models shown are not UK specification. Some of the equipment shown is optional.

Design Selection Lodge

The seats feature grey embossed textile material in combination with a green tone Techtona, while the green stitching sets off the whole look. This is complemented by grey speckles pad with light green stitching, and the Sense of Light décor provides the perfect finishing touch.

Models shown are not UK specification. Some of the equipment shown is optional.

Design Selection Suite Black

The seat upholstery combines black and grey Techtona with grey stitching, which is also used on the Techtona dashboard pad. The Grained Maple décor brings all of the interior elements together.

* Black headliner and three-spoke steering wheel available as an option.
Models shown are not UK specification. Some of the equipment shown is optional.

Design Selection Suite Ceramique

The focal point of this Design Selection is the Techtona Ceramique seat upholstery, which brightens the interior with its light colour and is complemented by grey stitching. The same combination is repeated on the dashboard pad. The Grained Maple décor is the finishing touch that completes the stunning play of contrasts.

Models shown are not UK specification. Some of the equipment shown is optional.

Design Selection SportLine

The sporty look meets luxury with the combination of Suedia and black fabric on the seat upholstery, with Cool White stitching providing a striking contrast. The Suedia material and white stitching is repeated on the dashboard pad, while the Glacier Metallic décor completes the look. The sports steering wheel with paddles adds a sporty finishing touch.

Models shown are not UK specification. Some of the equipment shown is optional.

Figures shown are for comparability purposes; only compare fuel consumption, CO₂ and electric range figures with other vehicles tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles, vehicle load and the starting charge of the battery. Figures for battery electric vehicles were obtained after the battery had been fully charged. Battery electric vehicles require mains electricity for charging. Charging times will depend on various factors, including temperature, state of the battery, state of and capabilities of the charging unit and power supply. Actual charging time will vary depending on the level of charge in the battery, as well as environmental conditions. Charging times will also be affected by the charging curve for example once charging passes 80%, charging will slow to protect the battery's longevity. The availability of the maximum electrical output could be limited. The amount of power available in individual driving situations depends on various factors, such as ambient temperature and the charge status, temperature and condition or physical age of the high-voltage battery. Data correct at production from 20th August 2026. Choice of wheels and other options may affect consumption and range data. For more information, please see skoda.co.uk/owners/wltp-info or consult your chosen **Škoda Retailer**.

Additional information

Škoda Financial Services

Škoda Financial Services offer a wide range of finance, insurance and servicing packages designed to fit your needs. We specialise in providing simple and convenient funding options for Škoda drivers.

Škoda Financial Services offers a range of finance options including Solutions Personal Contract Plan, Hire Purchase or Contract Hire for your Škoda Peaq.

Škoda Car Insurance

Complimentary Škoda Drive Away Insurance

Every new and Approved Used Škoda comes with five days' complimentary insurance cover, getting you on the road quickly and easily so you can enjoy the things that matter. Škoda Drive Away Insurance is designed specifically for your Škoda and guarantees that your car will be repaired in a Škoda Approved Repairer. Speak to your chosen **Škoda Retailer** for more details.

Subject to eligibility and activation.

We will also provide you with an annual quote, with no additional questions asked, so you can continue to enjoy all the benefits Škoda Car Insurance offers.

Read on for more details.

Škoda Car Insurance

Škoda Car Insurance offers quality service and support when you need it most, with a policy tailored specifically for your Škoda. Just as you'd expect from Škoda, our annual car insurance provides comprehensive cover, with lots of benefits included at no extra cost.

Insure your car with Škoda and relax knowing we only use Škoda trained technicians, who know your car inside out, and Škoda genuine parts*, giving you the peace of mind that your Škoda will be repaired to the same high standards as before and to original manufacturer specifications.

You also have the added reassurance of electric charging cables and home charger cover, as well as cover for accidents caused by any electric charging cables, when attached to your car. Plus, we'll cover damage to your car's electric battery, whether it is owned or leased, if it becomes damaged as a result of an insured incident.

*Excludes windscreen claims.

To get a quote or find out more, visit **insurewithskoda.vwfs.co.uk/car-insurance**

Alternatively, call us on **0330 678 6328**. Lines are open 8am-8pm Monday to Friday and 9am-5pm Saturday and Bank Holidays. Calls may be recorded.

Škoda Car Insurance is arranged, underwritten and administered by Liverpool Victoria Insurance Company Limited (part of Allianz). Volkswagen Financial Services Limited (VWFS UK) acts as an introducer to Liverpool Victoria Insurance Company Limited in respect of Skoda Car Insurance, registered in England and Wales Company Number 2835230 (Registered Office Address: Brunswick Court, Yeomans Drive, Blakelands, Milton Keynes MK14 5LR). VWFS UK is authorised and regulated by the Financial Conduct Authority, registration number 311988. Authorisation details for both organisations can be checked on the Financial Services Register by visiting <https://www.fca.org.uk/firms/financial-services-register>.

Service and maintenance

Our range of servicing and maintenance plans will help to keep your Škoda in prime condition. Plus, the price is fixed so you won't be caught out by any unbudgeted costs.

All our service plans use genuine Škoda approved parts and trained technicians so you know your car is in the hands of experts. Parts and labour also come with two years warranty too.

Service Plans for Electric Vehicles under one year old

This includes your vehicles first service, covering you for two years for a fixed payment, protecting you from inflation. You can choose to pay upfront or monthly. The Service Plan includes a maximum of one inspection service, one pollen filter change and one brake fluid change. Electric vehicle services are set to a fixed regime.

Our service plans are designed for customers that travel 10,000 miles or less per year. If you travel over 10,000 miles per year, or would prefer to add maintenance or tyres, then speak to your chosen **Škoda Retailer** to create a more tailored service plan.

All electric vehicles must be set to a fixed service regime. Exclusions and terms and conditions apply. Offer is available to retail customers only from participating Škoda Retailers. Offers may be varied or withdrawn at any time. Freepost Škoda Financial Services.

Škoda Financial Services is a trading name of Volkswagen Financial Services (UK) Limited, Brunswick Court, Yeomans Drive, Blakelands, Milton Keynes MK14 5LR. Registered in England number 2835230.

Service intervals

Your Peaq is supplied with a fixed service regime to ensure that your car stays in the best possible shape. A service light will show when the car requires inspection at 24 months.

To keep your Peaq operating as it should we recommend the following work is carried out every 24 months:

- > Inspection – we'll make sure all the components and systems work as they should.
- > Pollen Filter – we'll renew the Pollen Filter to keep your vehicle cabin clear of dust and odours.
- > Brake Fluid – we'll renew your brake fluid to maintain braking efficiency and function.

Roadside assistance

A one year, European-wide, unlimited mileage Škoda Assistance policy comes free of charge with every new Škoda. There's a team of specially trained technicians who carry the right diagnostic equipment and parts to get you back on the road as quickly as possible in the unfortunate event of a breakdown.

Škoda Roadside Assistance 24-hour helpline: 0330 100 3243.

Provided in partnership with the AA. Exclusions and terms and conditions apply. For details please speak to your chosen **Škoda Retailer**.

Customer services

Talk to us on **0370 333 4449**. No matter what the query, our dedicated call centre is always ready to listen. No matter how big or small the request, speak to one of our customer care advisors to see if they can help. The call centre is open Monday to Friday, 9am to 6pm and on Saturday 9am to 1pm. Excludes Bank Holidays. You can also talk to one of our advisors via live chat, open Monday to Sunday from 8am-10pm.

A network that's here to help

You can be sure that as a Škoda customer, your chosen **Škoda Retailer** will look after you from the moment you walk through the door and throughout the life of your Škoda. Your Peaq will be serviced and maintained by specially trained Škoda technicians, and when you need a spare part you'll be happy to know that most are held in stock, or ordered within 24 hours. So if top class customer satisfaction is what you're after, the Škoda network will be there for you.

Additional information – continued

Motability

People who are in receipt of one of the following allowances, and have at least 12 months remaining on their reward, may be eligible for a vehicle via the Motability scheme.

Enhanced Rate of the Mobility Component of Personal Independence Payment (PIP), Higher Rate Mobility Component of Disability Living Allowance (HRMC DLA), War Pensioners' Mobility Supplement (WPMS), Armed Forces Independence Payment (AFIP), Higher Rate Mobility Component of the Child Disability Payment (CDP), or Enhanced Rate Mobility Component of the Adult Disability Payment (ADP).

For full details of the scheme, current model availability and pricing, please contact the Motability specialist at your chosen **Škoda Retailer**.

Warranty

Peace of mind with a Škoda warranty

In the first two years of owning your car, you'll get the peace of mind of a two year unlimited mileage warranty. In addition, you'll also get a further warranty on new vehicles supplied through the appointed retail network until the vehicle has completed 60,000 miles or the end of the third year, whichever is sooner. Your Epiq also benefits from a three-year paint warranty and 12-year body protection warranty.

Exclusions and terms and conditions apply.

Owning a Škoda

Three-year vehicle warranty from new

First two years unlimited mileage. Third year with 60,000 mile limitation, whichever is sooner. Four to five years Optional Extended Warranty.

Three-year paint warranty

Up to 12 years body protection.

Exclusions and limitations

Wear and tear components will only be considered under the terms of the warranty for the first of six months or 6,500 miles, whichever is soonest. These include, but are not limited to brake linings and disc pads, clutch release bearings, clutch pressure plates and centre plates, tyres, wiper blades, seat and backrest covers, floor coverings, spark plugs, batteries for key fobs and alarms, light bulbs and shock absorbers. Mechanical adjustments including but not limited to adjustments to doors, flaps, boot lids, bonnets and sunroof, brake adjustment, clutch adjustment, v belt adjustment, headlight adjustment, steering geometry adjustments and wheel balancing are excluded.

Damage (including but not limited to the following) is excluded:

- > Damage caused by your failure to take all reasonable steps to prevent mechanical damage from occurring.
- > Damage or defects caused by not having the vehicle serviced in accordance with the manufacturer's guidelines.
- > Damage or defects caused by improper use of the vehicle, neglect or use of the vehicle for motor sports activities.
- > Damage caused by an accident.
- > Damage to paintwork or chrome caused by external influences, such as climatic, chemical or industrial pollution.
- > Damage resulting from the use of non-original replacement parts.

Routine maintenance and servicing is not covered by the warranty. Incidental or consequential costs such as hotel charges, car hire, and loss of personal effects or income are not recoverable under the terms of the warranty.

8 Year high-voltage battery Warranty

Free repair of the high-voltage battery, if the damage occurs within 8 years or before reaching a mileage of 100,000 miles (whichever occurs first) from the beginning of the Škoda warranty. Reduction in the capacity of the high-voltage battery over time is a natural feature of technology and does not constitute a defect within the meaning of the Škoda warranty (this is with regards to a natural lock), provided that this value measured by the Škoda service partner does not fall below 70% of the total usable capacity before the expiry of 8 years or before the achievement of 100,000 miles (whichever comes first) from the beginning of the Škoda warranty.

In the event of a claim under the Škoda warranty regarding damage to the high-voltage battery, the capacity of the high-voltage battery after fault rectification is at least 70% of the total usable capacity, and this is in consideration of all relevant factors including the age, condition and the mileage of the vehicle. There shall be no further claims arising from the Škoda Warranty. In particular, no claim for replacement, no right of withdrawal, no claim to purchase price reduction, or provision of a replacement car for the duration of repair and compensation.

Adding that little extra to your car

If the standard specification and factory fitted options aren't enough for you, then why not take a look at our range of Retailer fitted accessories? A separate accessories brochure can be found at your chosen **Škoda Retailer**, or can be viewed online at: skoda.co.uk/owners/accessories-and-merchandise

Figures shown are for comparability purposes; only compare fuel consumption, CO₂ and electric range figures with other vehicles tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles, vehicle load and the starting charge of the battery. In order to preserve the usable capacity of the battery as much as possible, it is recommended to set a charging target of 80% for daily operation and use (which can be switched to 100% before long distance journeys for example). Figures for battery electric vehicles were obtained after the battery had been fully charged. Battery electric vehicles require mains electricity for charging. Data correct at 30th July 2026. Choice of wheels and other options may affect consumption and range data. For more information, please see skoda.co.uk/owners/wltp-info or consult your chosen **Škoda Retailer**.

Škoda UK may change RRP's at any time (this includes where there are government changes in regulation and/or legislation). There may be a delay to any RRP displaying correctly on our materials. Always obtain prices from your chosen **Škoda Retailer**.
