

Public Sector Guide

SKODA

Contents

We do hope you enjoy exploring the full range of Škoda vehicles easily in this guide. From the Fabia to the all-electric Enyaq SUV or Coupé, our award winning range is designed to help meet the needs of your organisation. Whether your move to electric vehicles is gathering pace, or not making the most of the continuing advantages of petrol and diesel vehicles, whatever type of fuel you choose, we could have a model to suit, whatever valuable service you are providing.

Disclaimer:
This vehicle is a WLTP (Worldwide Harmonised Light-Duty Vehicles Test Procedure) type approved vehicle. More information is available at [skoda.co.uk/owners/wltp-info](https://www.skoda.co.uk/owners/wltp-info). Figures shown are for comparability purposes, only compare fuel consumption and CO₂ figures with other vehicles tested to the same technical procedures. These figures may not reflect real life driving results, which will depend upon a number of factors including the accessories fitted (post-registration), variations in weather, driving styles and vehicle load. Škoda may change 'On the road' Recommended Retail Price prices at any time. Pricing valid as of 4th April 2023. On the road pricing includes 1st April 2023 VED rates. BIK rates valid as of 6th April 2023. Data correct as of 17th July 2023. Information regarding tyre technical specifications can be found by visiting the Škoda car configurator.

SKODA

A perfect partnership.

Škoda and Crown Commercial Service Framework.

Crown
Commercial
Service
Supplier

From front line service delivery to central government and local authorities to not-for-profit organisations, our place on the Crown Commercial Service Vehicle Purchase Framework ensures we continue to help support every kind of public sector fleet*. Whatever your goals, whether its sustainability and decarbonisation, improving productivity and total cost of ownership or seeking alternatives to grey fleet travel, we're here to help you find solutions for your specific needs.

To support you in your choices and help you get the right balance, we offer a wide range of award-winning cars to suit the unique needs of your operation. And with a selection of fuel types, whether that's electric vehicles, petrol or diesel cars or a combination of both, you'll have everything you need to develop your fleet in a way that's right for you.

Conversion options

Škoda Fleet works closely with Volkswagen Group approved specialist converters to deliver fully converted vehicle solutions to suit your specific fire and rescue, police and ambulance service needs. To help you reduce the environmental impact of your fleet, bespoke blue-light conversions are also available for our all-electric Enyaq.

Helping you go electric

Wherever you are in your sustainability journey, we can help you meet your carbon reduction targets with our and all-electric Enyaq range. And because we know that finding the right path to electrification can be challenging – especially for specialist vehicle fleets – we're here to help at every step of your journey.

*RM6244 Purchase of Standard & Specialist Vehicles

- > Boot capacity of 570 litres
- > 5 star NCAP
- > Range of interior designs available with 4x4 options

Škoda Powerpass

Charge with just one card practically anywhere

Charging will be a big aspect of your EV ownership, so it's good to know that with Powerpass you have access to over 17,000 public charge connectors across the UK – with just one card. This also includes 6,630 chargers in the bp pulse charging networks, so you can fit charging effortlessly into your day-to-day life. Additionally, the Powerpass will provide you with access to the expanding IONITY fast charging network across Europe as well.

Once the selected tariff has been activated, the Škoda Powerpass offers standard market prices as well as transparent and convenient monthly invoices.

And to make things even easier, you'll also be able to see all your charging data and payments, neatly, in one app.

- > **Three flexible, transparent charging tariffs**
- > **Access to charging networks from almost all operators**
- > **Charge with just one card practically anywhere**
- > **Fast charging with IONITY**
- > **Ready for Plug & Charge**

Take advantage of the subsidised packages available for Enyaq range customers in the first 12 months[^] of ownership, as summarised below:

- > **Charge Free tariff at £0 per month[^]**
- > **Simply Charge at £4.99 per month[^]**
- > **Charge Faster at £13.99 per month[^]**

To learn more, click [here](#).

T&Cs
Powerpass is a service provided by the Elli Company – Volkswagen Group Charging GmbH. Customers can pick from 3 packages, charge free, Simply Charge and Charge Faster. The first 12 months are discounted on the 3 tariffs when customers purchase an Enyaq SUV and Coupé. For more details on the terms and conditions please click [here](#). IONITY prices are subject to change in early 2023.

Getting started with Powerpass is easy

Simply follow these 3 steps, and then you can start charging with Powerpass.

Step One

Download the app

Use the QR code.

Or use one of the links below.

App Store (iOS) - [Click here](#)

Google Pay (Android) - [Click here](#)

Step Two

Order your card

In the Powerpass app, fill in your personal data, select the charging tariff that best suits your needs, then order your card.

Step Three

Pair your Powerpass

Once you receive your card, simply pair it with your account in the Powerpass app.

Ohme

Get the right start for your electric journey

If you'd like the convenience of a smart home charger that minimises the impact on energy bills, a smart charger through our preferred home wallbox supplier Ohme, might be the right opportunity for you.

Smart charge with Ohme

Our partnership with Ohme will help make the switch to electric easier and save money by charging when prices are lower and when renewable energy generation is at its highest.

You can find more information here:
<https://ohme-ev.com/partner-skoda>

Maximise savings

If you have a time-of-use tariff or a variable tariff from a provider such as **Octopus Energy**, Ohme uses your tariff information to charge at the cheapest times. This means you can take advantage of reduced costs without having to remember when to plug in.

Minimise carbon footprint of electricity use

The Ohme server communicates with the grid which allows you to charge using electricity with a low carbon intensity which can help reduce the carbon footprint.

Remote management

You can also start, stop or schedule charges so you can get on the road faster, and even set a price cap with the Ohme app.

Release pressure from the grid

Ohme adjusts energy intake according to peaks and lows in demand. Smart EV charging in periods of low demand helps balance the grid and save you money, as energy suppliers generally offer cheaper electricity during off-peak hours.

Charge your car for less with Ohme

Our smart tech helps you charge at the cheapest and greenest times, so you can save money whilst doing your bit for the environment. Discover the options.
